AI COMPLY

Your fully integrated, end-to-end solution for AI compliance

powered by enzai

Welcome to AI Comply

In today's fast-paced AI landscape, compliance is the cornerstone of responsible AI deployment. Organisations must establish robust governance to maximise the commercial opportunities of artificial intelligence while safeguarding customers and protecting their brand. A comprehensive, seamless solution covering every aspect of AI compliance from start to finish is essential.

Our ambition

Our aim is to not only solve today's challenges but also offer clients a sustainable framework to ensure their AI compliance remains robust and adaptable for the future. We see four key pillars of comprehensive support:

1. providing advice to address immediate business needs;
2. helping build the internal teams and frameworks to drive long-term self-sufficiency in AI compliance;
3. equipping teams with the tools and technology to facilitate AI compliance through an efficient blend of human resource and technology; and
4. providing enduring business partner support to ensure our

clients remain compliant into the future, no matter how the landscape of AI regulation evolves.

Our solution

Our comprehensive artificial intelligence compliance solution "**AI Comply**", delivered through EIGHT - our award-winning connected service arm, combines expert legal advisory, cutting-edge AI governance software from leading providers Enzai, and compliance operations consultancy to provide the most complete and robust AI Compliance solution on the market.

How it works?

AI Comply is a flexible, modular toolkit designed around three core components, which can be used individually or as a complete solution to deliver greater value. Our lawyers craft tailored policies and procedures specific to your business needs. These can then be integrated into our industry-leading governance platform, featuring interactive frameworks and live compliance dashboards, providing a single source of truth for managing compliance. With real-time updates and maintained compliance suites, you'll stay ahead of industry developments effortlessly. Finally, our expert consultants work with you to build a sustainable compliance function around these tools,

empowering your business for long-term self-sufficiency.

Core benefits?

➤ Cost-effective

AI compliance requires a multi-disciplinary approach, encompassing legal, technical, and operational expertise. By consolidating all these services under one roof, we provide a single-source solution that reduces costs, simplifies management and ensures consistency.

➤ End-to-end

Our multi-limbed approach delivers everything you need in one place. This reduces the complexity of managing multiple vendors and ensures you benefit from a coherent, efficient compliance strategy tailored to your specific AI applications.

➤ Flexible

Our solution is designed to adapt to your unique requirements, offering the flexibility to scale and evolve with your business. Whether you need basic AI governance or a fully integrated compliance operation, our end-to-end services ensure you can respond swiftly to changing demands.

AI COMPLY

Your fully integrated, end-to-end solution for AI compliance

**Solutions you might not expect.
Expertise you do.**

Three modular components, one powerful solution

Legal Advisory Services

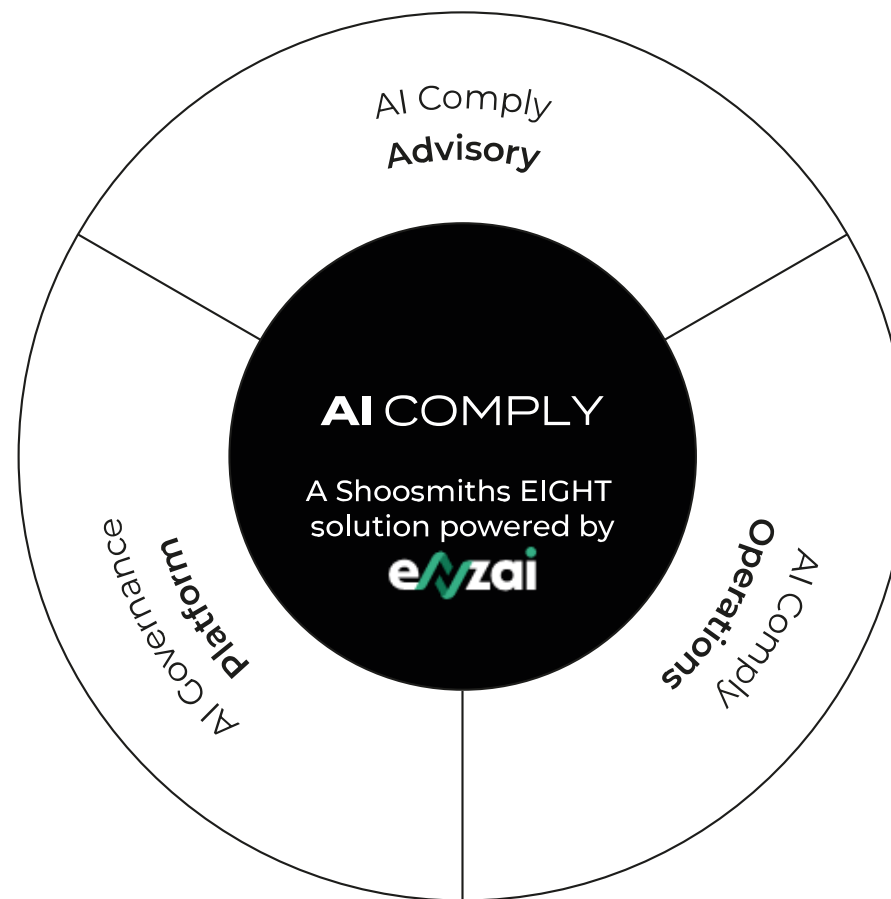

Our team of specialist AI lawyers provide comprehensive guidance on every aspect of AI, from development to deployment, and from AI assurance through to ongoing governance, to enable our clients to harness the full potential of these technologies whilst navigating an ever-evolving regulatory landscape.

The team comprises specialists with knowledge spanning the full range of regulatory, commercial, data privacy and intellectual property issues posed by AI. Coupled with its active engagement with policy-makers, legislators, industry groups and thought leaders on AI from across the UK, EU and beyond, the team is able to support our clients at every point in their AI strategy and procurement lifecycle, enabling them to effectively manage risk whilst embracing innovation.

AI Governance Platform

At the heart of our solution is a cutting-edge AI governance platform, developed in collaboration with Enzai, a leader in AI

governance. This powerful platform gives you ultimate control and oversight of your AI systems, ensuring compliance with the

latest regulatory standards and internal policies. Our legal advice can be seamlessly integrated into the platform, creating a

single source of truth with maintained policies and real-time support at the click of a button.

Compliance Operations Capability

Whether you're building your first AI compliance function or refining an existing operation, our consultants help create lean, efficient compliance frameworks to meet today's challenges and prepare for the future. Whether your AI compliance is integrated into broader compliance or legal functions, our experts, with decades of experience, build and embed the right structures, reporting and technologies to support ensure your team operates as efficiently as possible.
